

THE SOFTWAVE EDGE

10 REASONS TO CHOOSE THE BEST

1. ELECTROHYDRAULIC TECHNOLOGY

Electrohydraulic technology is a gold standard in shockwave for its effectiveness for deep tissue penetration and its ability to create a shockwave right from the spark.

2. RESEARCHED & RESPECTED

Founded in 2004, SoftWave technology is widely used and endorsed by experts in orthopedics, wound care, and urology. It has 41 patents with more pending and is in over 100 current research studies. It's utilized at leading medical centers like Harvard, UCLA, and Cleveland Clinic, and trusted by major sports organizations, including MLB, NFL, NBA, and UFC, to treat professional athletes.

3. FDA INDICATIONS

SoftWave offers providers confidence in safety and effectiveness with four FDA Clearances.

4. MANUFACTURING EXCELLENCE

SoftWave is an FDA-inspected facility and is manufactured in Germany ensuring superior quality, precision, and regulatory compliance. The unique E³ Performance Design means engineering efficiency and effectiveness.

5. HASSLE-FREE, SAFE MAINTENANCE

SoftWave offers easy, reliable maintenance with a simple drain and power-switch shutdown process. SoftWave's applicator refurbishment is as simple as a pack-and-ship process.

6. LESS PER TREATMENT COST

SoftWave is a premium technology delivering exceptional efficiency and value. Its wide therapeutic zone shortens treatment times, reduces labor costs, and ensures high patient satisfaction, driving repeat visits. With true cost per treatment in mind, SoftWave offers unmatched ROI and long-term profitability for practices.

7. HIGH PATIENT SATISFACTION

SoftWave's flexible membrane and real-time patient feedback ensure treatments are tailored for effectiveness, comfort and tolerance. This customization enhances patient satisfaction, promotes compliance, and fosters loyalty, leading to better outcomes and repeat visits.

8. BROAD-FOCUSED TECHNOLOGY

SoftWave's patented broad-focused applicator design delivers energy across a large area of both superficial and deep tissue, stimulating a biological response in the target area to initiate the body's natural healing process.

9. AT-YOUR-SITE TRAINING

SoftWave's Certified Trainers come directly to your clinic, providing hands-on training for your providers and staff on evidence-based protocols. This convenient approach allows providers to treat their own patients, experience predictable outcomes in real-time, and avoids the need for time away from the clinic.

10. PROVEN TRACK RECORD

SoftWave's Certified Trainers come directly to your clinic, providing hands-on training for your providers and staff on evidence-based protocols. This convenient approach allows providers to treat their own patients, experience predictable outcomes in real-time, and avoids the need for time away from the clinic.
